

# Final Assignment

[S201.Env203Geo305.S10]

Name: Afroja Anwar Bidisha

ID: 1831666630

- *All materials submitted for grading must conform to standard NSU guidelines, failure to do so may result in loss of credit. Submitted document must be your own work. You may take assist from different sources, but don't copy. Documents will be reviewed using plagiarism checker.*
- *You can download, complete, and upload the assignment; or use google doc.*
- *Each 10 marks*

Please share your feedback on the following observations;

1. Share your opinion on the geographic approach to Climate Change? (max. 100 words)

**Ans)** Climate varies greatly depending on geographic locations and changes over a period of time. Globally there are of five types: tropical, dry, temperate, cold and polar. Tropical climates are hot and humid, desert is a dry climate, temperate climate have hot summers and cold winters, Cold climate had moderate rainfall and higher variations, and polar climate lacks a true summer. Global warming associated with climate change have caused ice sheets and glaciers melting at an accelerated rate every season and together with rising temperatures resulting in sea level rises, it's leading to coastal damages, and the story doesn't end here.

2. Explain the different aspects of a city and compare them with your neighborhood. (max. 100 words)

**Ans)** Cities are defined as densely populated busy people extensive system for housing, transportation, sanitation, utilities. Land use and transportation set up of a city depends on the following aspects: physical condition of the area, cultural aspects, religion and population. Dhaka, the capital of Bangladesh has a population of over 11 million, making it well congested to live in. But, I'm well habituated to this. Moghbazar area, where I grew up has congested

roads mostly filled with rickshaws, buses, trucks and vans. In Dhaka, even though it is over-populated, there some recreational parks such as Ramna park, Balda garden etc.

3. You prefer to eat on the table or floor? And why? (max. 100 words)

**Ans)** Eating on the floor is a very common norm in our society, and so do I prefer. We basically adopted this from our forefathers, and science proves certain benefits of it. When we eat sitting on the floor it helps weight loss since our brain stays calm in this posture and cognates the amount of food we eat, making us full faster. The main reason people overeat is because they do not know when they are full. When a person is seated the main nerve in the brain can transmit signals with stomach and other body parts better.

4. Explain the geographic spread of pandemics. (max. 100 words)

**Ans)** A pandemic is something more global, affecting the whole country or even the whole world and related to the disease being widely spread geographically. Pandemics existed over thousands of years. In the 14th century, the Black Death swept 25% of the European continent's population. The Asian (1956-1958) originated in China lasted two years with a death toll of 2 million spreading to Hong Kong, Singapore and the US. The sixth Cholera pandemic lasted from 1910-1911 with a death toll of more than 800,000 originating from India spreading to the Middle East, North America, Eastern Europe and Russia. And the story doesn't just end here.

5. What is the first thing you plan to do after social-distancing is over? (max. 50 words)

**Ans)** Firstly, I will try to help the underprivileged people who are badly hit by the global pandemic by reaching out to them, especially financially and provide them with necessary household items. Secondly, I will socialize with my friends and family who I couldn't reach out during the lockdown.

Thank you Sir, take care, stay safe, and enjoy.
